

Jawad Sami Ul Haq

Full Stack Software Engineer | .NET / React

jawadsamiulhaq.code@gmail.com • +92 347 8615710 • Punjab, Pakistan
jawadsamiulhaq.vercel.app • linkedin.com/in/jawad-sami-ul-haq

Working experience in C#, ASP.NET Core and SQL Server, with React from personal and freelance work — focused on applications that scale, perform and stay maintainable.

Work Experience

Software Engineer

Present

Exceleron Communications — Lahore, Pakistan

- Handle a client portal for field operations management, built on .NET, ASP.NET Core, EF Core, and SQL Server.
- Own a site status tracking module — a region-aware approval workflow with bulk Excel/JSON import and dashboard reporting.
- Manage internal project and task tracking, including a workflow-driven lifecycle with assignment, closure, and deadline-based escalation that rolls up status across related tasks.
- Maintain a support ticketing system, covering ticket lifecycle management, team-based assignment, and bulk data import.
- Handle user authentication and access control, covering token and session-based login, multi-factor authentication, and role-based permissions.

Freelance Web Developer

Aug 2024

PPC Evolutions (Direct Client) — Multan, Pakistan

- Delivered a responsive marketing website for an Amazon PPC advertising agency, covering services, process, and case-study pages to support lead generation.
- Built a contact/audit request form as the site's primary lead-capture mechanism, along with testimonial and social-proof sections.
- Refined a provided template into a client-specific website using HTML, CSS, and JavaScript, improving visual consistency and usability.
- Managed domain deployment with analytics and Google indexing.

Projects

Lumina

A production-style, full-stack ecommerce platform with an integrated admin dashboard, dynamic catalog management, and seamless Stripe payment integration.

React • TypeScript • ASP.NET Core • EF Core • SQL Server • Tailwind CSS

UAF CGPA Calculator

Jul 2023 – Aug 2023

A CGPA calculation tool integrated with UAF's LMS through web scraping, automatically retrieving and organizing academic results into a clean, table-formatted view of semesters, course codes, grades and quality points.

Web Scraping • Automation • JavaScript

Real-Time Chat Application

Jul 2024

A real-time messaging web app built on the MERN stack, with JWT authentication and bcrypt password hashing to keep accounts secure.

MongoDB • Express.js • React • Node.js

Gemini Clone

May 2024

An AI chatbot interface inspired by Google Gemini, built to practice API integration and conversational UI design.

React • API Integration • UI/UX
